

Rarely do I voice my opinion about the services that I pay for. Usually poor quality would get me motivated to speak out. The options that I have with XM Satalite Radio far excede that available through local airwaves. I do a lot of driving up and down the state of Arizona. XM benifits me!Also I would add, hopefully with improvements in technology, the highways and byways will be made safer, by making information available to XM Satalite users. What I mean is that while I am listening to my XM I would have the ability to be made aware of possible hazzards as I travel!

I wonder how many others would agree with me?

Sincerely,
Todd Davis
